

# Evolutionary Genetics Seminar (GGG298)

Spring 2008

Mondays, 4 pm

LSA 1022

**March 31**

Graham Coop  
 University of Chicago  
 “Geographic patterns and models of natural selection in humans”

**April 7**

Gil Bejerano  
 Stanford University  
 “Dispensability of mammalian DNA”

**April 14**

Doris Bachtrog  
 University of California, San Diego  
 “Evolutionary genomics of sex chromosomes in Drosophila”

**April 21**

Jeff Wall  
 University of California, San Francisco  
 “Evidence for ancient admixture in multiple human populations”

**April 28**

Monty Slatkin  
 University of California, Berkeley

**May 5**

Kelly Dyer  
 University of Georgia  
 “Mind your Xs and Ys: Sex chromosome dynamics in mushroom feeding Drosophila ”

**May 12**

Yun Tao  
 Emory University  
 “Meiotic drive and Speciation”

**May 19**

Adam Siepel  
 Cornell University  
 “Comparative genomics of animals and plants”
